Genomic Constraint of Surrounding 1kb Region

This variant does not have non coding constraint data for the surrounding region.

Age Distribution

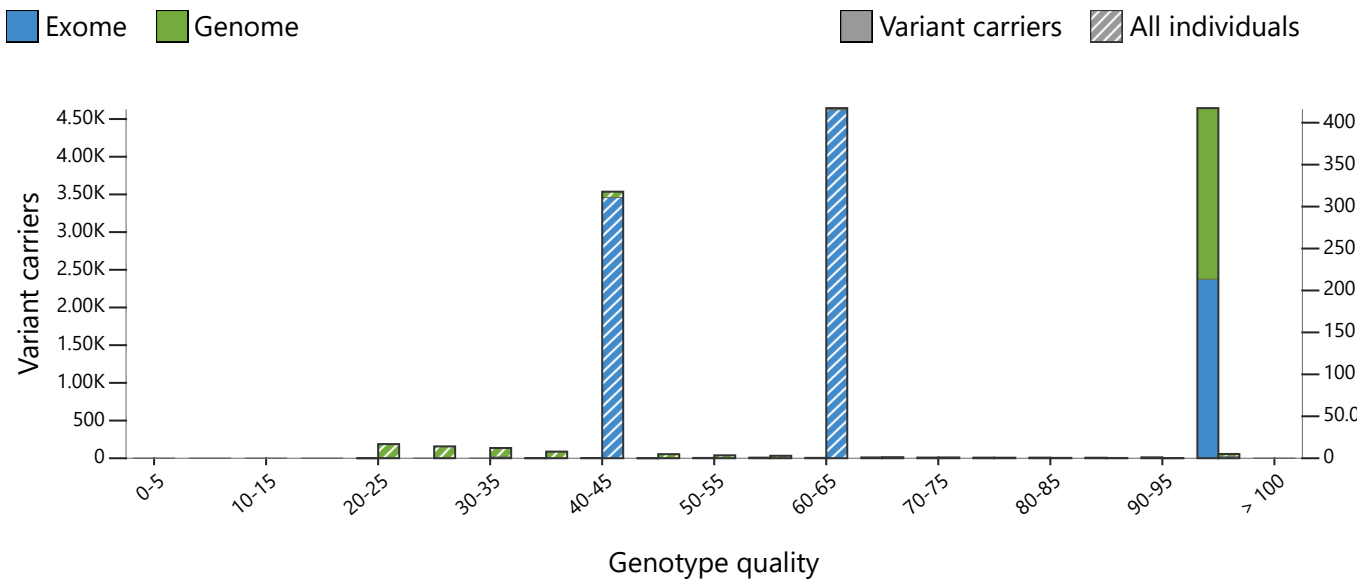

Include heterozygous variant carriers
Include homozygous variant carriers
Compare to all individuals

Sequencing types: Exome and Genome

Genotype Quality Metrics

Genotype quality | Depth | Allele balance for heterozygotes

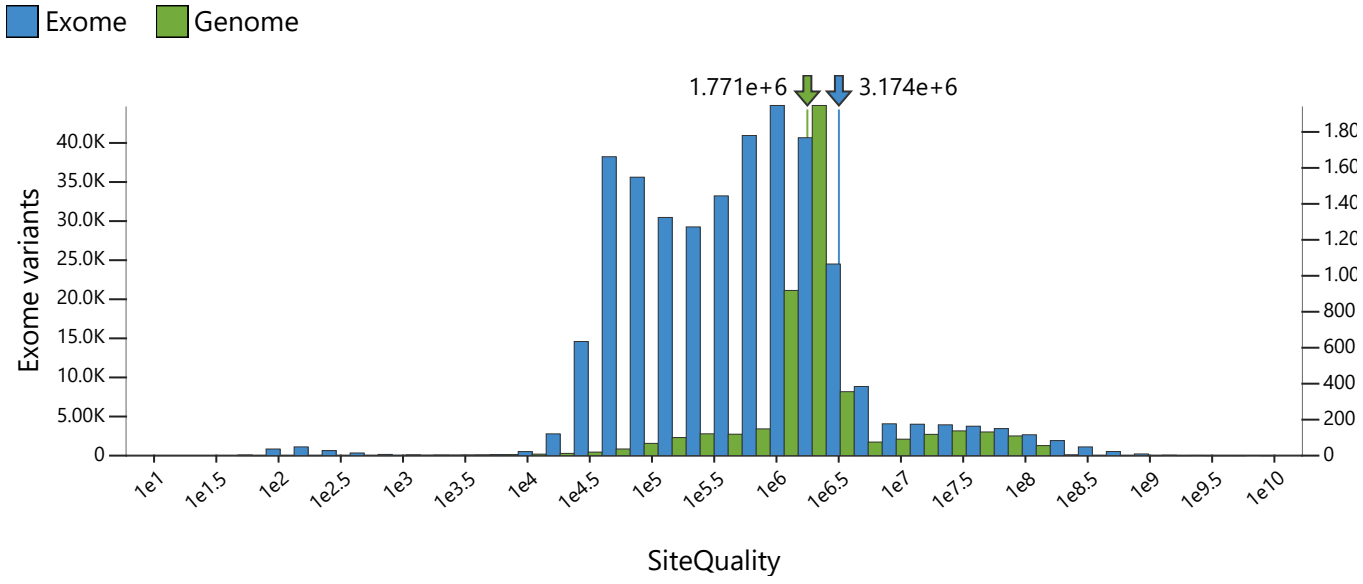

Compare to all individuals

Sequencing types: Exome and Genome

Site Quality Metrics

Metric distribution | All metric values

Metric: SiteQuality

Sequencing types: Exome and Genome

Value: 3.174e+6 (exome samples), 1.771e+6 (genome samples)

Site quality approximation for all variants with 0.01 <= AF < 0.02.

Note: These are site-level quality metrics, they may be unpredictable for multi-allelic sites.
