Ensembl Variant Effect Predictor

This variant falls on 9 transcripts in 1 gene.

Note The gene symbols shown below are provided by VEP and may differ from the symbol shown on gene pages.

Genomic Constraint of Surrounding 1kb Region

This variant does not have non coding constraint data for the surrounding region.

ClinVar

ClinVar Variation ID 478324

Conditions

not provided, Developmental and epileptic encephalopathy, 53, Early-onset Parkinson disease 20, Inborn genetic diseases, SYNJ1-related disorder, not specified

Germline classification Likely benign

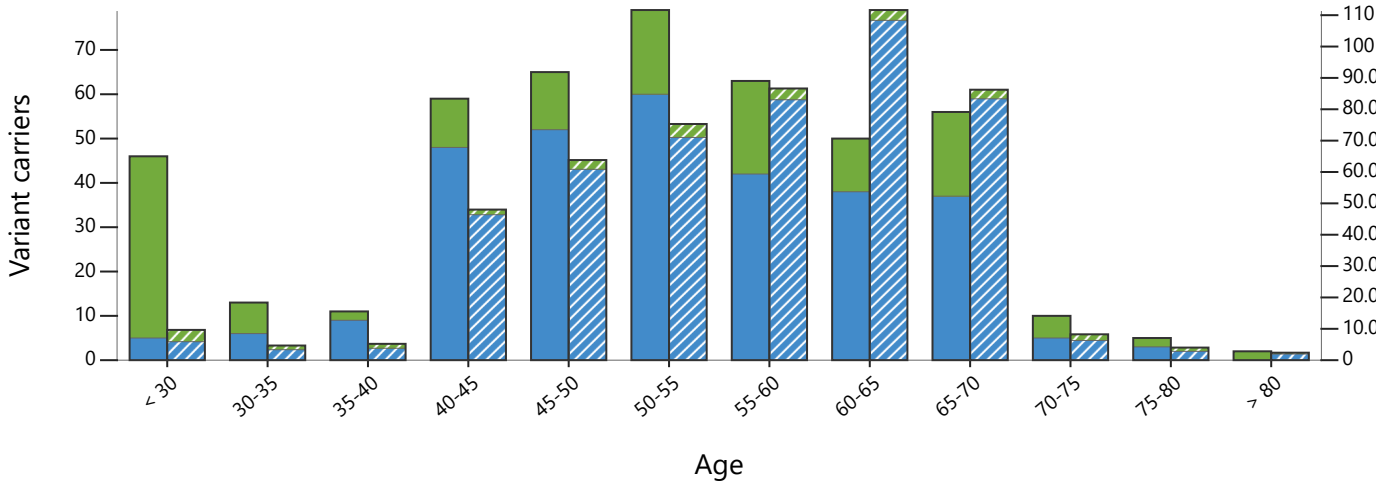

Review status criteria provided, multiple submitters, no conflicts (2 stars)

Last evaluated 3 февраля 2026 г.

See all 7 submissions or find more information on the ClinVar website. Data displayed here is from ClinVar's 11 октября 2026 г. release.

Age Distribution
