Age Distribution

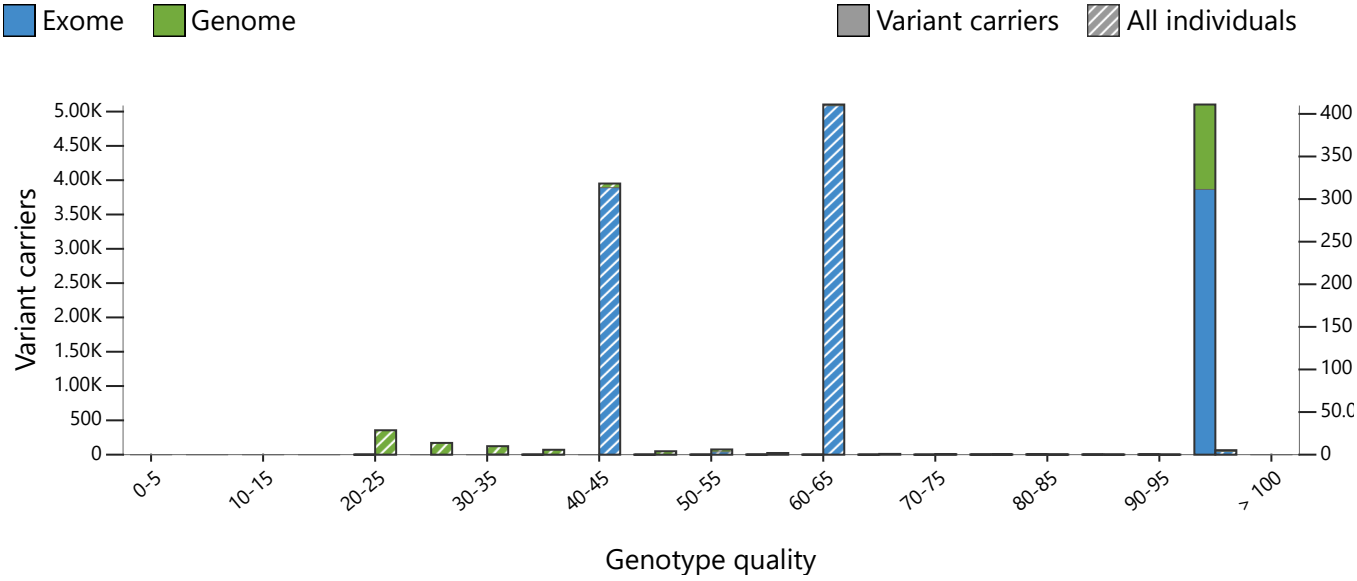

Include heterozygous variant carriers
Include homozygous variant carriers
Compare to all individuals

Sequencing types: Exome and Genome

Genotype Quality Metrics

Genotype quality | Depth | Allele balance for heterozygotes

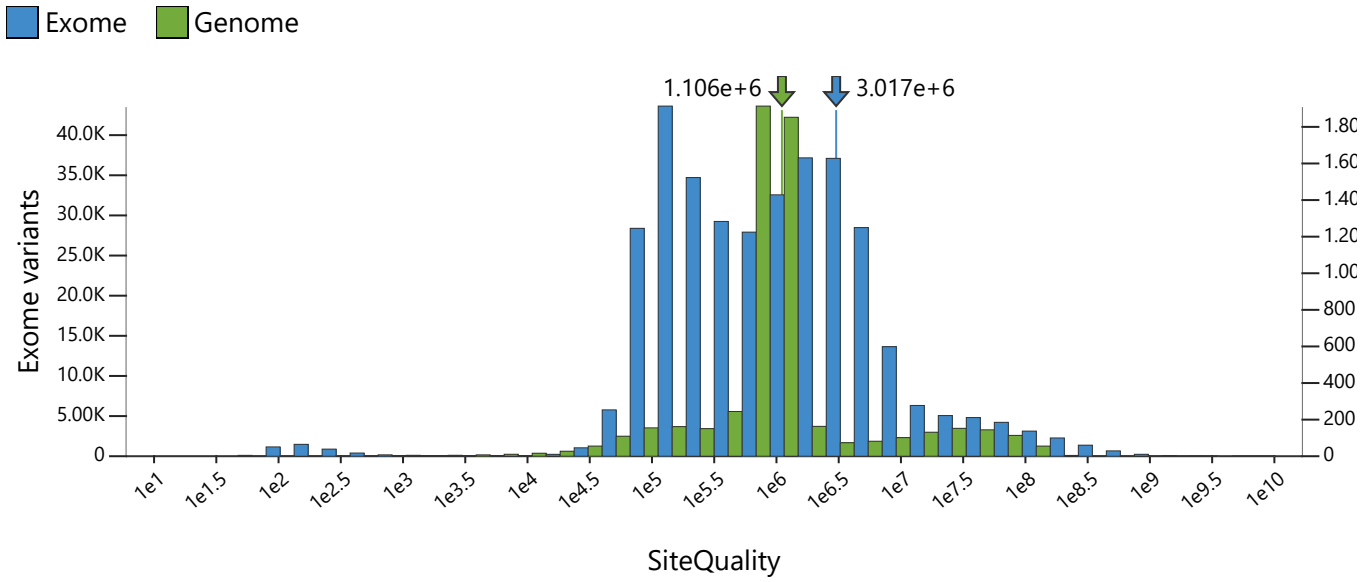

Compare to all individuals

Sequencing types: Exome and Genome

Site Quality Metrics

Metric distribution | All metric values

Metric: SiteQuality

Sequencing types: Exome and Genome

Value: 3.017e+6 (exome samples), 1.106e+6 (genome samples)

Site quality approximation for all variants with 0.005 <= AF < 0.01.

Note: These are site-level quality metrics, they may be unpredictable for multi-allelic sites.
